Bugatti Spares

For over 20 years Ivan Dutton Limited has invested heavily in the production of quality pattern work and forging dies to produce previously unobtainable replacement parts for Bugatti cars.

We now list in excess of 800 parts for these cars, ranging from individual nuts and bolts to complete sub-assemblies such as engines, gearboxes and back axles.

Along with these reproductions of original parts we also produce sensible modifications aimed at improving the usability of Bugatti cars in modern conditions, these include overdrives, high energy ignition systems and Cerami-metallic clutches. Our latest project is the reproduction of 8 cylinder Bosch magentos which, when completed, will be identical in every way, including quality, to the originals.

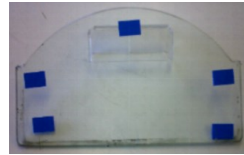

Ivan Dutton Limited has an ongoing commitment to the Bugatti Owner and the legacy of Ettore Bugatti.

Inside this catalogue you will find a large selection of the parts we supply however if you are unable to find what you are looking for please contact us as not everything is listed here.
